Meet at Memphis Picnic Area in Cleveland Metroparks' Big Creek Reservation. Big Creek, running through the west side of Cleveland and adjacent suburbs, is a major tributary to the Cuyahoga River.

We'll learn about urban watersheds, collect water samples, and measure and compare the physical, chemical, and biological characteristics of the East and West Branches of Big Creek with professionals involved in watershed stewardship.

- The events will occur rain or shine.
- Bring rubber boots if you have them and be ready to get your feet wet (only if you choose).
- Minors must be accompanied by an adult.
