

Prairie Planting Event

SATURDAY, APRIL 14TH | 10:00AM | Brookside Reservation

Spring into summer by planting a native prairie!

This planting project is open to all volunteers who would like to participate. We will be manually planting native prairie plants at the one-acre site at Cleveland Metroparks Brookside Reservation.

This area is a restored Ohio prairie habitat that was established in 2007 and is also a certified Monarch Way Station intended to provide habitat for native and migrating butterflies. By enhancing the prairie site with Ohio native plants, you will help support our important pollinators.

Bring gloves, a hand trowel, and a water bottle, and dress for the weather. We will provide a limited supply of work gloves and shovels for volunteers.
